BUSINESS REVIEW

The Group is principally engaged in distribution of apparel products and household products, including the provision of distribution and supply chain management services specialising in trading of garment and household products.

To establish a competitive position in the marketplace and ensure the sustainability of business, the management has identified a viable competitive strategy through analyzing the business environment of the Group, and the strengths, weaknesses, opportunities and risks that exist for the Group. Among others, creating a sustainable business and differentiating itself from its competitors are the key points. As such, the Group helps customers to identify suitable suppliers and quality garment, household and textile products, and offers an one stop procurement solution which successfully differentiates itself from other generic procurement service providers.

Furthermore, customers with limited internal purchasing resources or those who lacks the market intelligence to find reliable suppliers can also benefit from the Group's distribution business as a single point of contact to manage the entire procurement process by (i) accessing the Group's network of manufacturers and wholesaler; (ii) having effective liaison with suppliers in the garment and textile industry; (iii) identifying suitable suppliers within the Group's network of manufacturers and/or wholesalers to meet the tailored requirements of the customers; (iv) relying on the customized procurement plan prepared and the logistics services provided by the Group and the execution of the customized procurement process; and (v) using the optional services provided by the Group or sub-contractors sourced by the Group (including but not limited to packaging service and furniture installation service). The Group believes that such business relationships will create a win-win result and will be beneficial to the growth and prosperity of each stakeholder.

During the period under review, the management has exerted great effort to streamline and optimize the process of the Group's distribution business, currently it can be divided into five key stages, which are: (i) understanding the tailored requirements of customers; (ii) organizing a customised procurement plan for customers; (iii) identifying suitable suppliers within the Group's network of manufacturers and/or wholesalers to meet the tailored requirement of the customers; (iv) maintaining effective liaison between the customers and those suitable suppliers identified; and (v) executing the customised procurement process.

MANAGEMENT DISCUSSION AND ANALYSIS

The product mix under the Group's distribution business consists of consumer garments such as innerwear, casual wear and baby and children wear and household related textile products like curtain, bed covers, table cloth, linens and other household products. At present, PRC and Hong Kong markets are the primary focus of the Group's distribution business.

FINANCIAL REVIEW

The revenue of the Group for the three months ended 31 March 2019 was approximately HK\$2.0 million, representing a decrease of 24.4 times from the same period last year. For the three months ended 31 March 2019, the Group's revenue contributed from household products, innerwear and clothing products (other than innerwear) were HK\$Nil, HK\$Nil and approximately HK\$2.0 million respectively (2018: approximately HK\$43.5 million, approximately HK\$0.2 million and approximately HK\$4.8 million). There was no sales order of household products of the distribution business in the period under review, mainly due to the uncertainty of the Company's listing status. This resulted in significant decrease in the Group's revenue.

Cost of sales of the Group for the three months ended 31 March 2019 was approximately HK\$1.6 million, representing a decrease of 27.5 times from approximately HK\$44.0 million for the three months ended 31 March 2018. The decrease in cost of sales was mainly due to the decrease in sales order during the period under review.

Other income of the Group for the three months ended 31 March 2019 was approximately HK\$3.4 million, representing an increase of 76.1 times from approximately HK\$45,000 for the three months ended 31 March 2018. The increase in other income was mainly due to the gain on disposal of an investment property of HK\$3.4 million (the "Disposal"). Further details of the Disposal have been disclosed in the announcement of the Company dated 11 December 2018.

The loss of the Group for the three months ended 31 March 2019 was approximately HK\$3.6 million as compared to the profit of approximately HK\$17,000 for the three months ended 31 March 2018. This decline in performance was mainly due to the significant drop in the Group's revenue as mentioned above and the increase in administrative expenses of the Group, mainly due to an increase in legal and professional fees.

LIQUIDITY AND FINANCIAL POSITION

The Group generally finances its operation through internally-generated cash flows, banking facility provided by a bank and loan from a shareholder during the period under review. The bank facility provided by a bank has been fully repaid during the period under review. As at 31 March 2019, cash and bank balances of the Group amounted to approximately HK\$6.1 million (as at 31 December 2018: HK\$5.0 million) excluding the pledged bank deposit with fixed term of 1 month amounted to HK\$Nil (as at 31 December 2018: HK\$10.1 million). A loan from a shareholder amounted to HK\$25 million (as at 31 December 2018: HK\$25 million) and related interest payable of HK\$286,000 (as at 31 December 2018: HK\$531,000) which is unsecured, repayable on demand and interest bearing at 3% per annum. The current ratios (current asset divided by current liabilities) of the Group were 0.84 times and 0.92 times as at 31 March 2019 and 31 December 2018 respectively.

CAPITAL MANAGEMENT

The Group's objectives when managing capital are to ensure that entities in the Group will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The management reviews the capital structure by considering the cost of capital and the risks associated with each class of capital. In view of this, the Company will balance its overall capital structure through the payment of dividends, new share issues as well as the issue of new debt or the redemption of existing debt as it sees fit and appropriate.

The Group monitors when managing capital on the basis of the gearing ratio. As at 31 March 2019, the gearing ratio was (313.2)% (31 December 2018: (665.2)%). This ratio is calculated as dividing total debt from time to time by total capital. Notwithstanding the above, the Directors closely monitor the liquidity of the Group. Taking into account of the following matters:

- (i) on 28 February 2019, the disposal of an investment property classified as held for sale was completed and the proceed of HK\$4,200,000 was received during the period under review;
- (ii) in addition to the amount due to Mr. Yun Liguo ("Mr. Yun") as at 31 March 2019 amounting to HK\$25,286,000 (including interest payable of HK\$286,000), there is loan facility amounting to RMB6,842,000 (equivalent to approximately HK\$7,986,000) not yet utilised by the Group;

MANAGEMENT DISCUSSION AND ANALYSIS

- (iii) on 4 March 2019, Mr. Yun and the Group entered into a loan agreement to make available to the Group a loan in the principal sum of RMB30,000,000 (equivalent to approximately HK\$35,016,000) for the future working capital requirements of the Group; and
- (iv) Mr. Yun has agreed in writing not to demand the Group to repay the amount due to him (including the amount of HK\$25,000,000 which was outstanding as at 31 March 2019 and any additional amount to be utilised by the Group subsequent to the end of the reporting period) until the Group is in a financial position to repay.

The Directors consider that after taking into account the internal resources and the above matters, the Group will have sufficient working capital to finance its operations and to meet its financial obligations as and when they fall due for the foreseeable future taking into account the internal fundings along with the above measurements.
